Udacity Project In Data Analyst Nanodegree

Data Analytics: Welcome to the Investigate a Dataset project! Most people can understand the visualizations, as 40% of the people can answer basic questions about the information provided on the record visualizations. Therefore, when providing information in the form of linear charts, people show a good understanding of the plotsand provide accurate forecasts in this project..

Visualizations Data Analysis

Comparing the quality of the best algorithm

The quality of the first algorithm works doubly for the neural network, and this expectation is poor when using other algorithms.
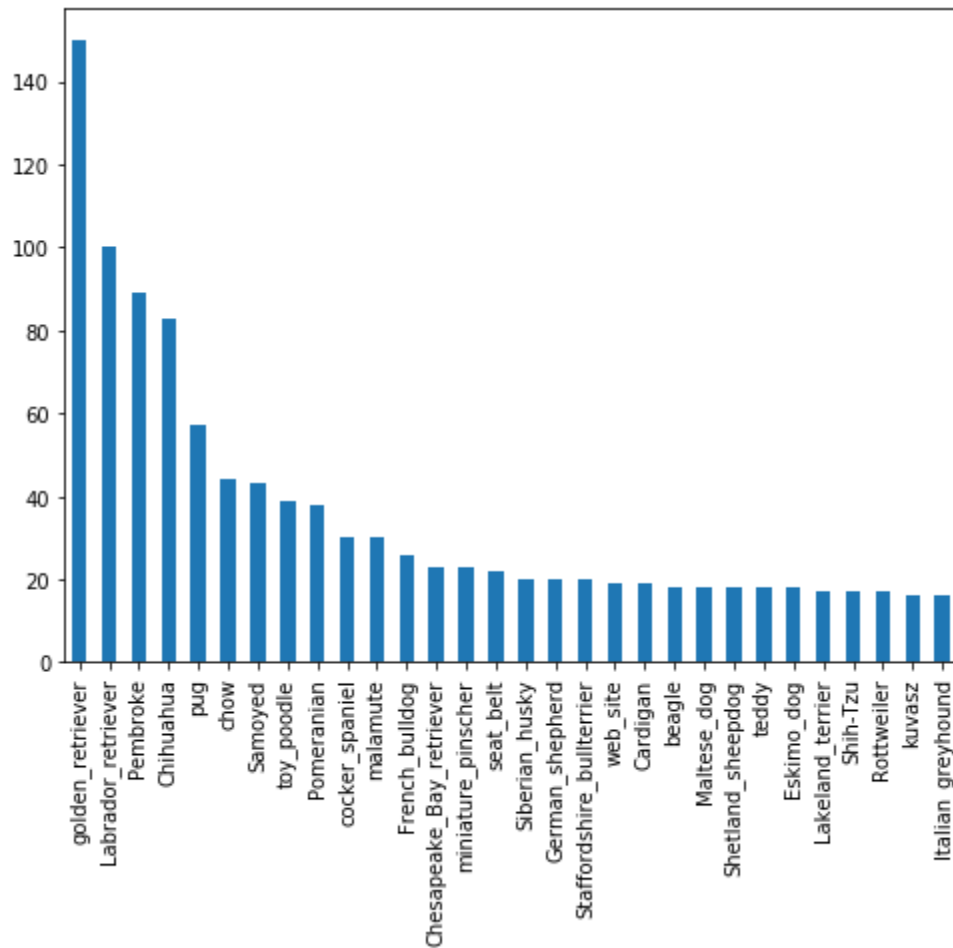

number of dogs a dog 'stage' is available

By adding the columns and calculating the average, it was found that most dogs do not have `stage` The percentage of puper dogs is approximately ten in total compared to the second doggo in the order by 5 in total.
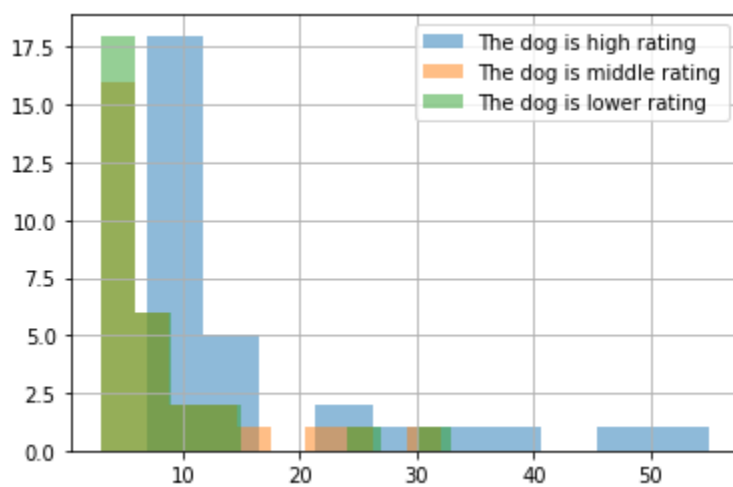

The rare and widespread origins of the breed of dogs

it is necessary to focus on rare assets to preserve them and can be cross-breeded to find a strain that has the desired genetic traits for many species. Neglect of dogs with aggressive and non-coexisting characteristics with members of society who are of low rank
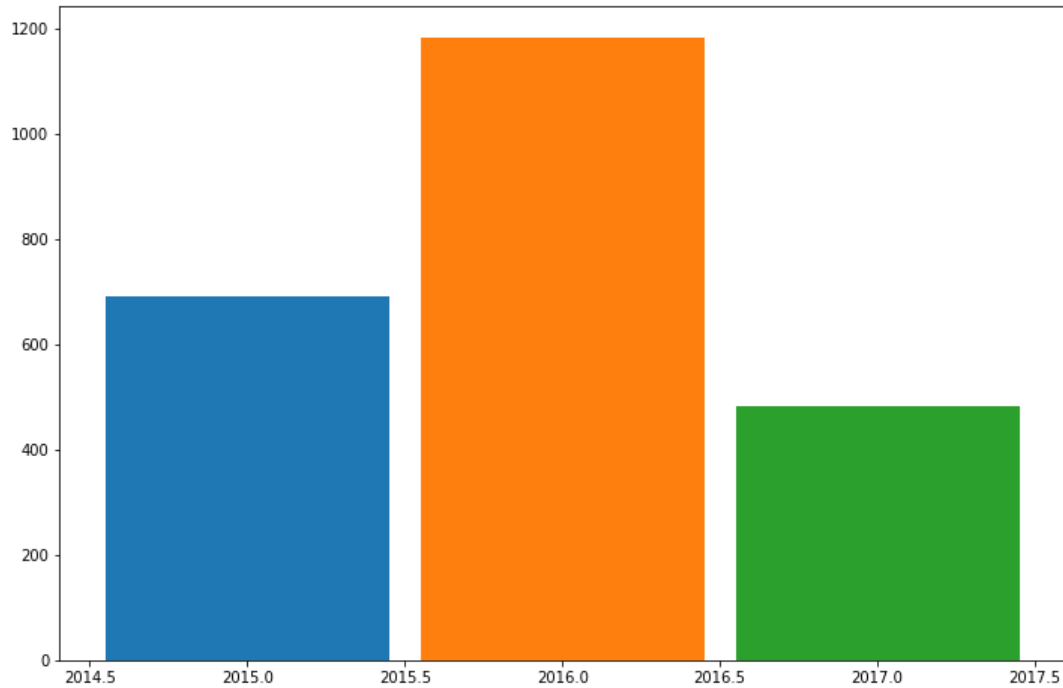

dogs is not desirable in the market

High-rated dogs are acquired more often than medium-sized dogs, while low-rating dogs are unwanted on the market.
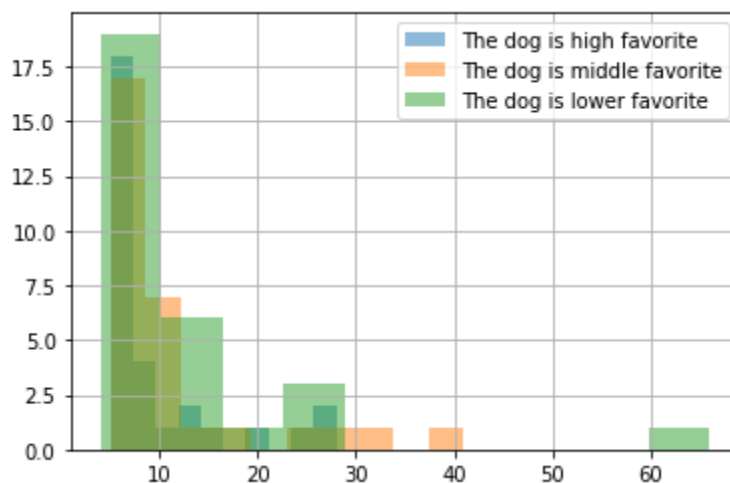

**number of dogs are the most tweet of all years**

From the number of views, the number of tweets in the tension has increased from 2015, as it peaked in 2016 and then began to decrease in 2017.

dogs are the most favorited of all years and each year

Determine which dogs are the most admired of all years? And the best breed of dogs that achieved admiration for every year? Until an investment project is made in education

We identify unwanted dogs that cannot compete in the market for demand and supply?
